Director

CIA

Dear Sir,

I'm enclosing ads for my books on maps, all currently in print and selling. I am also Colorado Coordinator for the National Council for Geographic Education. My published articles have been in the New York Times (over 70), Glamour, Grade Teacher, etc.

Your general reference maps of foreign countries look to me like something that teachers should know about. I'd like to try to write an article about them for the Journal of Geography.

Could you send me a free collection to study? I don't know any other good source for individual maps of countries that include so much geographical material and come at a reasonable price.

Sincerely,

*Susan Marsh*
